

# Manufacturers of Zinc Oxide

Established in the year 1985, the Kannan Group is a leading manufacturer of zinc oxide in India.

The rapidly expanding organization specializes in the production of high-quality zinc oxide from its units in Tamil Nadu and Pondicherry.

A frontrunner in its domain, the Kannan Group has set standards over the years with its use of cutting edge technology for the production of premium zinc oxide. Come, discover the world of Prepress.

### At Kannan Group, our customers come first.

Our vision is rooted in customer satisfaction, and we strive to deliver this every single time through our refined processes and unmatched quality.

With our consistent and timely deliveries, we continue to rank among the leading zinc oxide manufacturers in India and are preferred by customers from across the country.

### Process and Technology

At Kannan Group, we follow the French Process (Indirect Process), which is widely used across the globe in zinc oxide production.

We use special high grade zinc as raw material, in turn manufacturing zinc oxide that's small in particle size and high on purity (99.89% Min).

### Quality Assurance

A two-pronged approach helps us achieve our consistent quality levels while exceeding the expectations of our customers. We employ:

- The right technology
- The right people

We use state-of-the-art equipment and modern laboratories to stay ahead of the race, while also conserving resources along the way. Every consignment is closely tracked and inspected to ensure that it fulfils all client specifications.

### Products and Applications

We strive to deliver the purest zinc oxide in the market. Our product powers many industries and has multiple applications.

- Rubber
- Paints
- Glass & Ceramics
- Pharmaceuticals
- Coatings and Pigments, etc.

#### KANNAN CHEMICALS
